LIQUIP STATIC WIRE REEL DISCONTINUED IN PRE CUT LENGTHS

Dear Distributors,

In an effort to improve production operations and responsiveness for key Liquip manufactured products, a decision has been made to discontinue the supply of Liquip Static reel cable in pre-cut lengths.

Liquip wishes to inform all distributors that the SR100-18 yellow wire, which is used on Liquip static reels (LSR100) is now only available in reels of 1,000m. This change will be effective immediately.

Should you have any questions, please contact your local Liquip Representative.
