IMPROVED API VALVE SIGHTGLASS

Dear Valued Customers,

As part of Liquip's continuous improvement efforts, we have upgraded the sightglass used on the standard API490 series API discharge valves.

The API490-16 sightglass has been replaced with the improved API490-24 sightglass.

The improved API490-24 sightglass is of high strength, transparent nylon material and has been tested and proven to provide like product compatibility as per the API490-16.

Both the old and new sightglass have the same mounting arrangement.

The API490-24 will be supplied as standard with all Liquip API490 series discharge valves in lieu of the API490-16.

Please Note: The sightglass remains unchanged on the API49xC version.

Ordering Information

- **API490-24K** - Transparent nylon API sightglass with Viton O-ring and fasteners.
- OR
- **API490-16K** - Borosilicate sightglass with Aluminium housing to suits API496

API496 fitted with the improved API490-24 sightglass

Regards,

Liquip
