

## **All Electric Rewind Hose Reels**

3 March 1994

Tech Talk No:       **T009**  
Product:             **Motor Mount Bracket for Electric Rewind Hose Reels**  
Part Number:       **ER12 HP-2**

To:                   **All Distributors**  
                          **Sydney Sales Department**  
                          **Sydney Workshop**

The motor mount bracket for electric rewind hose reels has been changed to simplify build up of electric rewind hose reels from standard hose reels at the Sydney factory.

This change will be made when current stock of motor mount brackets is used up, probably around the end of 1994.

The summary of changes is as follows:

- \*       New bracket part number ER12 HP-2
- \*       Motor rotation changed to clockwise rotation.
- \*       Bracket bolts to opposite side of A-frame.

The part numbers for 12V (P1335) and 24 V (P1336) flame proof motors stay the same. We will simply order the motors with clockwise rotation or, any motors rotation can simply be changed by our electrician if required.

The new electric rewind hose reels will be easily distinguished from the old ones by the bracket position as shown in the sketch.

Hose reel drum rotation will be the opposite direction to what it has been. Bear this in mind when mounting new electric rewind hose reels on a vehicle.
